

AGILE DEVELOPMENT BENEFITED CUSTOMER TO FOCUS ON CORE BUSINESS

Good Technology

About the client:

Good Technology is a mobile security solutions provider headquartered in Sunnyvale, California, United States. The company serves more than 5,000 organizations worldwide in industries such as financial services, healthcare, manufacturing, energy and utilities, legal, government, and technology. Good technology makes products for managing and securing mobile devices in a business environment.

Problem statement:

Development and maintenance of Good Enterprise server's like GFE and GEMS against Exchange mail server and Domino mail server was required.

Types of testing:

- C++, Visual Studio 2005 compiler, Cygwin for GFE product
- Java, OSGI Framework, Angular JS for GEMS product
- Domino (8.0.X, 8.5.x, 9.0, 9.0.1), iOS and Android platforms
- Exchange (2010,2013) iOS and Android platforms
- Defect tracking Rally / JIRA: Agile project management
- Good Internal tool: To Decrypt the Logs.

Proposed solution:

- Support and maintenance of GFE product for FIRST tickets
- Identifying the root cause and fixing the issues.
- Development of new features planned for GFE server.
- Development of new features planned for GEMS server.
- Provide the build to QA team for testing.
- Deliver the newer versions/builds to market on-time as aligned to Good Technology roadmap

Benefits delivered:

- Motivity approach towards agile development benefited customer to focus on core business
- Saved time in releases.
- Customer satisfaction.
- Faster delivery of work.
- provided Information security.
