

END TO END TESTING HELPS A GPS ENABLED MOBILE APP TO BECOME BUG FREE

Glympse

About the client:

is a mobile service that allows GPS-enabled mobile phone users to share their location via a Web-based map for a pre-set period of time with anyone they choose. Glympse wanted to have their application working aptly across mobile devices and across different OS systems. A through testing of this app was necessary.

Key requirements:

Glympse wanted to have their application working aptly across mobile devices and across different OS systems. A bug free app is to be produced.

Types of testing:

- Functional Testing
- Performance Testing
- Compatibility Testing
- behavior testing.

Testing tools:

- Manual Testing
- iOS 5.0
- iOS 6.0
- Ginger Bread
- Ice cream Sandwich.

Solution offered:

Motivity Labs chalked out a test strategy to perform different kinds of testing for Glympse Application and reported the number of bugs found in each platform as a part of their effort to make it bug free app.

Benefits delivered:

- Motivity labs reported 38 issues major in Android (24) and iOS (14) from the Production Build.
- This enabled the client to resolve the issues prior to Production release.
- Enhanced the performance of their app across devices.
- Unparalleled customer experience.
