OVERALL TESTING HELPED THE HEALTH CARE INSTITUTE TO INCREASE CONSUMER BENEFITS

About the client:

Apollo Hospitals was the forerunner of integrated healthcare in Asia, as well as globally. Today, the group's futuristic vision has ensured that it has been in a position of strength at every touch point of the healthcare delivery chain. Its presence encompasses over 56 hospitals, more than 1500 pharmacies, over 100 primary care & diagnostic clinics, 115 telemedicine units across 9 countries, health insurance services, global projects consultancy, 15 academic institutions.

Problem statement:

Apollo Hospital vision is to build the largest and the most trusted healthcare interoperability platform, which can empower healthcare customers to seek second opinion from the healthcare leaders across the globe. Lack of access to health care providers in the India is a massive, growing problem. The average wait time to see a physician is three weeks. Even if you can see a doctor, it takes 2-3 hours from the time you leave your home or office to the time you get back home.

Major challenges:

- Most of the testing is done on Wi-Fi, as the devices used for testing are brand new in the market and unlock codes are not available.
- Automation of enterprise solution, which is not a part of client requirement that includes both server and mobile client.

Testing:

- ML's Team is involved in writing test case and do manual / automation testing of mobile app i.e. micro site
- Testing on different mobile device end to end
- web application testing on different browser.

Benefits delivered:

- Tested 30+ devices belonging to various mobile platforms iOS, Android, Windows Phone, BlackBerry
- Motivity approach towards testing benefited customer to focus on core business and saved time in releases.
- Consumer satisfaction.
- Better healthcare performance.

About us:

Motivity labs is a U.S based mobile, cloud and Big Data insights solution provider with a global presence. We look forward to create applications using next generation technology. Motivity labs was incorporated in 2010 and has quickly risen to #138 on the Inc.
5000 by successfully executing projects including development and testing efforts for one of the largest software companies in the world along with many startup companies.
